

EasyClean²

Packing recommendation

For the shipment of the Hatz DOC/DPF which has to be exchanged, please pay attention to the following packing recommendation, in order to avoid damage and complications during transport:

Carton type: **Quality level 2.0002 BC** (very stable)

Carton size: **620x260x310**

Dust bag: **DPF must be packed into a bag to avoid soot discharge**
> most suitable to use is the original Hatz dust bag, but alternatively any other sufficient trash bag which is stable enough, will do.

Padding: **DPF must be secured with sufficient stable material to prevent a falling over**
> by appropriate corrugated cardboard padding
